BOX 820

HUNTSVILLE, ONT.

July 11, 1974.

Mr. S.R. Morss,
R3 Bradford, Mass.,
USA.

Dear Mr. Morss:

While recently going through our DX files, I came across your reception report of CKAR-1 PARRY SOUND, dated December 18, 1974.

Apparently, the letter we sent to you, verifying the report, was returned to us, due to insufficient address, which upon reviewing, does not match the information you gave us. Then, due to a change in our Engineering Dep't, your letter was lodt, in a file, until I brought it to the attention of our Technical Director, J. Ken Harbinson.

We were particularily pleased because you sent a tape, with the report, which we feel should accompany all DX reports. We also were interested in your reference to the Old CHPS station, which unfortunately we don't know too much about, except it went out of business, in the late 40's. CKAR-1 is only 250 watts, and is a ~~xka~~ satellitex station, being fed from Huntsville, which is about 60 miles away.

We would like to hear from you, in feference to CHPS, or any other DX activity you have been involved with. Once again, thanks for the report, and sorry for the slight delay in getting back to you. Until next time, I remain,

Sincerely,

Jeff Murray,
Announcer CKAR.
